Appl. No. 10/735,218  
Reply dated February 16, 2007

1. Listing of the claims:

1-51. Cancelled.

52. (Previously Presented) A system for locating a user of a wireless communications system wherein the wireless communications system has a central computer connected to one or more access points which communicate wirelessly with a badge associated with a user, the system comprising:

a badge having a microphone that accepts a voice-based locate command;

means for determining, based on the voice-based locate command, the current access point being used for communications by the badge of the user being located; and

means for generating a location indicator for the user wherein the location indicator is the name and location of the access point currently being used by the user.

53 - 58. Cancelled

59. (Previously Presented) The system of claim 52, wherein the name of the access point further comprises one of a building name, a floor name and a functional area name.

60-64. Cancelled.
